

## Key elements Fish Pool Index™ and Monthly Settlement Price

published at Fish Pool webpage

### Fish Pool Index™

Fish Pool Index™ (FPI) is calculated every week and published at Fish Pool Website, [www.fishpool.eu](http://www.fishpool.eu), reflecting the market price for Superior quality Salmon, Head on gutted, iced and packed in boxes, reference exporters selling price FCA Oslo

To reflect one market price for salmon, an average of salmon size 3-6 kg is established.

### Monthly Settlement Price

FPI is the index used to create The Monthly Settlement Price (MSP) which is the benchmark used to settle all financial contracts traded at Fish Pool. MSP is calculated as the simple average of the weekly Fish Pool Index prices (not volume weighted) included in the Month

### Calculation

The following weightings are used when calculating FPI:

Index	Description	Weighting
Nasdaq Salmon Index	Average of achieved sales prices for exporters (Superior salmon 3-6 kilo).	95 %
SSB Export price,	Export price for fresh Salmon from Norway. Average of all sizes and qualities.	5 %

### Weight distribution

To compute a market price, Fish Pool uses the following formula:

Index	Price by sizes	Weighting
Nasdaq Salmon Index	Yes	30 % SUP3-4 40 % SUP4-5 30 % SUP5-6
SSB Export price	No	None

### Corrections, changes, audits, complaints etc

Please see the BMR Methodology on [www.fishpool.eu](http://www.fishpool.eu) item **Price information**. **Spot prices** for details concerning calculation, price corrections, changes, audits, complaints, minimum data available for calculations, judgements, procedures in case an index is unavailable etc.
